Sutton Park Primary School

Science Substantive Knowledge Progression

			Animals Inc. Humans			
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
 O - 3 years Make connections between the features of their family and other families. Notice differences between people. 3 - 4 years Understand the key features of the life cycle of an animal. Begin to understand the need to respect and care for the natural environment and all living things. Reception Describe what they see, hear and feel whilst outside. Explore the natural world around them. 	 Pupils should be taught to: identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals identify and name a variety of common animals that are carnivores, herbivores and omnivores describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense. 	Pupils should be taught to: notice that animals, including humans, have offspring which grow into adults find out about and describe the basic needs of animals, including humans, for survival (water, food and air) describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.	Pupils should be taught to: identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat identify that humans and some other animals have skeletons and muscles for support, protection and movement.	Pupils should be taught to: describe the simple functions of the basic parts of the digestive system in humans identify the different types of teeth in humans and their simple functions construct and interpret a variety of food chains, identifying producers, predators and prey.	Pupils should be taught to: • describe the changes as humans develop to old age.	Pupils should be taught to: identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function describe the ways in which nutrients and water are transported within animals, including humans.

			PLANTS			
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
 0 - 3 years 3 - 4 years Plant seeds and care for growing plants. Understand the key features of the life cycle of a plant. Begin to understand the need to respect and care for the natural environment and all living things. Reception Describe what they see, hear and feel whilst outside. Explore the natural world around them. 	 Pupils should be taught to: identify and name a variety of common wild and garden plants, including deciduous and evergreen trees identify and describe the basic structure of a variety of common flowering plants, including trees. 	 Pupils should be taught to: observe and describe how seeds and bulbs grow into mature plants find out and describe how plants need water, light and a suitable temperature to grow and stay healthy. 	 Pupils should be taught to: identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant investigate the way in which water is transported within plants explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal. 			

		LIVING T	HINGS AND THEII	R HABITAT		
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
 0 - 3 years Explore and respond to different natural phenomena in their setting and on trips. 3 - 4 years Begin to understand the need to respect and care for the natural environment and all living things. 		 Pupils should be taught to: explore and compare the differences between things that are living, dead, and things that have never been alive identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of 		 Pupils should be taught to: recognise that living things can be grouped in a variety of ways explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment recognise that environments can change and that 	 Pupils should be taught to: describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird describe the life process of reproduction in some plants and animals. 	 Pupils should be taught to: describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro- organisms, plants and animals give reasons for
Reception Describe what they see, hear and feel whilst outside. Explore the natural world around them.		 animals and plants, and how they depend on each other identify and name a variety of plants and animals in their habitats, including micro-habitats describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food. 		change and that this can sometimes pose dangers to living things.		 give reasons for classifying plants and animals based on specific characteristics.

			MATERIALS			
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
0 - 3 years	Everyday Materials Pupils should be taught	Uses of Everyday Materials	Rocks Pupils should be taught	States of Matter Pupils should be taught	Properties and Changes of Materials	
Explore materials with different properties. Explore natural	 distinguish between an object and the material from which it is 	 Pupils should be taught to: identify and compare the mitchilture for 	 compare and group together different kinds of 	to: • compare and group materials together,	Pupils should be taught to: • compare and group together everyday	
materials, indoors and outside.	from which it is made identify and name a variety of	suitability of a variety of everyday materials,	rocks on the basis of their appearance and simple physical	according to whether they are solids, liquids or gases	materials based on evidence from comparative and fair tests, inc,	
 3 – 4 years Use all their senses in hands-on exploration of natural materials. Explore collections of materials with similar and/or different properties. Talk about the differences between materials and changes they notice. 	 everyday materials, including wood, plastic, glass, metal, water, and rock describe the simple physical properties of a variety of everyday materials compare and group together a variety 	 materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. 	 simple physical properties describe in simple terms how fossils are formed when things that have lived are trapped within rock recognise that soils are made from rocks and organic matter. 	 observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) identify the part played by evaporation and 	 their hardness, solubility, transparency, conductivity (electrical & thermal), & response to magnets understand that some materials will dissolve in liquid to form a solution, and describe how to recover a 	
Reception Explore the natural world around them.	of everyday materials on the basis of their simple physical properties.			condensation in the water cycle and associate the rate of evaporation with temperature.	 substance from a solution use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating give reasons, based on evidence 	

 [T	
		from comparative
		and fair tests, for
		the particular uses
		of everyday
		materials,
		including metals,
		wood and plastic
		 demonstrate that
		dissolving, mixing
		and changes of
		state are
		reversible changes
		 explain that some
		changes result in
		the formation of
		new materials, and
		that this kind of
		change is not
		usually reversible,
		including changes
		associated with
		burning and the
		action of acid on
		bicarbonate of
		soda.

			ELECTRICITY			
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
0 - 3 years				Pupils should be taught to:		Pupils should be taught to:
3 – 4 years				 identify common appliances that run on electricity 		 associate the brightness of a lamp or the volume
Reception				 on electricity construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery recognise that a switch opens and closes a circuit 		 lamp or the volume of a buzzer with the number and voltage of cells used in the circuit compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches use recognised symbols when representing a simple circuit in a diagram.
				and associate this with whether or not a lamp lights in a simple series circuit • recognise some common conductors and insulators, and associate metals		

				with being good conductors.		
			LIGHT			
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
0 - 3 years			Pupils should be taught to:			Pupils should be taught to:
3 – 4 years			 recognise that they need light in 			 recognise that light appears to
Reception			order to see things and that dark is the absence of light notice that light is reflected from surfaces recognise that light from the sun can be dangerous and that there are ways to protect their eyes recognise that shadows are formed when the light from a light source is blocked by a solid object find patterns in the way that the sizes of shadows change.			 travel in straight lines use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye explain that we see things because light travels from light sources to objects and then to our eyes use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.

			SOUND			
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
0 - 3 years				Pupils should be taught to:		
3 – 4 years				 identify how sounds are made, 		
Reception				associating some of them with something vibrating • recognise that vibrations from sounds travel through a medium to the ear • find patterns between the pitch		
				of a sound and features of the object that produced it find patterns between the volume of a sound and the strength of the vibrations that produced it recognise that		
				sounds get fainter as the distance from the sound source increases.		

SEASONAL CHANGE								
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
0 - 3 years	Pupils should be taught to:							
3 – 4 years	 observe changes across the four seasons 							
Reception	 observe and describe weather 							
Understand the effect of changing seasons on the natural world around them.	associated with the seasons and how day length varies.							

		EVOI	LUTION AND INHERITA	ANCE		
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
						 Pupils should be taught to: recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.

			EARTH AND SPACE			
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
					Pupils should be taught	
					to:	
					 describe the 	
					movement of the	
					Earth, and other	
					planets, relative to	
					the Sun in the	
					solar system	
					 describe the 	
					movement of the	
					Moon relative to	
					the Earth	
					• describe the Sun,	
					Earth and Moon as	
					approx. spherical	
					bodies	
					• use the idea of the	
					Earth's rotation to	
					explain day / night	
					and the apparent movement of the	
					sun across the sky.	

			FORCES			
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Explore and talk about			Pupils should be taught		Pupils should be taught	
different forces they			to:		to:	
can feel.			 compare how 		 explain that 	
			things move on		unsupported	
			different surfaces		objects fall	
			 notice that some 		towards the Earth	
			forces need		because of the	
			contact between		force of gravity	
			two objects, but		acting between the	
			magnetic forces		Earth and the	
			can act at a		falling object	
			distance		 identify the 	
			 observe how 		effects of air	
			magnets attract or		resistance, water	
			repel each other		resistance and	
			and attract some		friction, that act	
			materials and not		between moving	
			others		surfaces	
			 compare and group 		 recognise that 	
			together a variety		some mechanisms,	
			of everyday		including levers,	
			materials on the		pulleys and gears,	
			basis of whether		allow a smaller	
			they are attracted		force to have a	
			to a magnet, and		greater effect.	
			identify some			
			magnetic materials			
			 describe magnets 			
			as having two poles			
			 predict whether 			
			two magnets will			
			attract or repel			
			each other,			
			depending on			
			which poles are			
			facing.
